DETAILED ACTION

Response to Amendment

1. This Office action is in response to the amendment filed 08/24/2010, wherein claims 1-11 are pending.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goto et al. (US 2002/0188097) for the reasons set forth in the Office action dated 02/24/2010.

Allowable Subject Matter

4. Claims 1-4 and 8-11 are allowed.

5. The following is an examiner's statement of reasons for allowance: These claims are allowable over Goto et al (Above), which represents the closest prior art of record. The claimed polymer consists essentially of the structural unit (1) and/or structural unit (2) and said polymer has an acid group introduced thereon (e.g., sulfonated). Goto et al discloses a homopolymer similar to the pre-acidified version of the claimed polymer. However, Goto et al fails to teach or suggest introducing an acid group (i.e., sulfonic acid) onto said homopolymer. Instead, what is taught is a sulfonated copolymer comprising one unit similar to the claimed unit and another unit different from the claimed unit, where the sulfonation is done on said second unit. Consequently, there is not an obvious reason for one skilled in the art to sulfonate the prior art homopolymer to arrive at the claimed polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

6. Applicant's arguments filed 08/24/2010 are only partially persuasive. The persuasive arguments are those with respect to the rejection of claims 1-4 and 8-11 where an acidified polymer is at the issue. However, the applicant seems to be unaware of the fact that the polymer and method of claims 5-7 do not involve an introduction of an acid group to a polymer. Such polymer and method are taught by Goto et al.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
